## CUSTOM

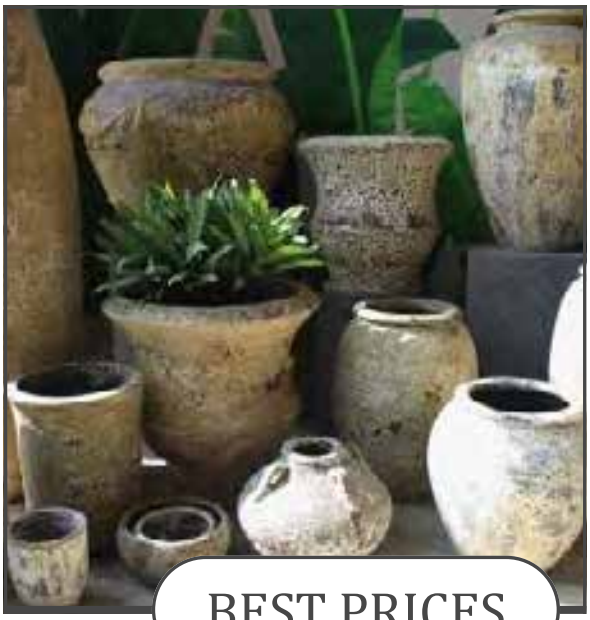
We create custom sizes and offer custom Australian Dulux colours for commercial customers who require custom options.

## QUALITY

We are involved in the Actual Design of each pot and pride ourselves on Quality Assurance to deliver you consistent Top Quality durability.

## EXPERIENCE

With over 30 years experience leading the industry we have the answers you need to get the job done right and protect your investment.



## BEST PRICES

We have the Best Priced Pots in Australia and by cutting out the middleman we pass on all the savings to you. So Call Us and Order Today.

# Custom Shapes & Sizes

Available in our StoneLite and GRC ranges

Can be made to your specifications

With our StoneLite range we have the shortest lead.time in the Australian industry

# Custom Australian Dulux® Colours

Available in our StoneLite, GRC, and Lightweight Terrazzo ranges

We use Australian Dulux, including WeatherShield, in the colour of your choice

Robust, durable finish, guaranteed by Dulux for 15 years against fading or peeling Easy to clean Easy to repair after vandalism

Colour-match to your project

## 5 REASONS WHY CUSTOM SPRAY IS THE BEST FINISH

1. **Your choice of great colours**, like our best-selling charcoal, Dulux® "White-on-White", or Colorbond® "Monument". We can do any colour in the Dulux® or Colorbond® ranges, as well as most other ranges. Matching to a project or existing installation is easy.
2. **Colours are consistent and won't fade over time, unlike most infused colours and inferior paints.** We use Australian Dulux® paints, including Weathershield, giving our custom spray Dulux's 15-year guarantee against blistering, peeling, or flaking. Dulux® is also renowned for its durability and colour quality.
3. **Easy cleaning**, despite harsh Australian conditions leading to dust and grime build-up. The surface can be easily cleaned with soap and water.
4. **Repair is easy too**, should your pots be damaged. Most will never need it, but if something does somehow manage to damage you pot, some builders' bog and a fresh lick of paint and your pot will be good as new.
5. **Watering needs are reduced**, as the paint seals the pot surface against evaporation.

### Helps Prevent These Aesthetic Effects

Helps prevent efflorescence, the white leaching bloom that appears on wet masonry and ceramics as water dissolves salts and minerals from fertiliser and concrete products and carries them through to the surface.

Helps prevent crazing, the fine web of tiny, shallow cracks that can form on ceramics, concrete, mud, and even wood.

Conceals the non-structural cracking that will occur in all concrete-based products due to shrinkage and expansion.

Cannot be washed out or leached away, unlike factory infused colours.

*Always plant in accordance with our planting guide.*

| 2300 | 2.0 | 4 | 24 | $229.95 |
| 4000 | 2.5 | 5 | 24 | $289.95 |

**Pump Safety Info**
We only sell high-quality, low-voltage pumps certified to Australian standards.

All our pumps are low-voltage, either 12 V or 24 V. We'd say that water features and electricity don't mix, but the reality is that they mix all too well—and when they do, you really want that electricity to be low-voltage. 240 V pumps run off mains power and are directly connected to the grid. They're cheaper, but they're a death trap. If your electrician or landscaper insists on a 240 V (mains power) pump in the garden, we recommend you find a new electrician or landscaper.

We recommend low-voltage pumps.
A 24V shock hurts, but a 240V shock can kill.
240V is mains power. Technically 24V can kill too, but it's *much* less likely. It's not as hard as you might think for children or animals to get to cables, and sometimes the water feature might become electrified. Low voltage gives everyone the best chance.

# Advantages of Custom Spray

## COMMERCIAL GRADE FINISH

Strongly recommended for Australian conditions
after 30 years in business.

## 5 REASONS WHY CUSTOM SPRAY IS THE BEST FINISH

1. **Your choice of great colours**, like our best-selling charcoal, Dulux® "White-on-White", or Colorbond® ''Monument". We can do any colour in the Dulux® or Colorbond® ranges, as well as most other ranges. Matching to a project or existing installation is easy.
2. **Colours are consistent and won't fade over time, unlike most infused colours and inferior paints**. We use Australian Dulux® paints, including Weathershield, giving our custom spray Dulux's 15-year guarantee against blistering, peeling, or flaking. Dulux® is also renowned for its durability and colour quality.
3. **Easy cleaning**, despite harsh Australian conditions leading to dust and grime build-up. The surface can be easily cleaned with soap and water.
4. **Repair is easy too**, should your pots be damaged. Most will never need it, but if something does somehow manage to damage you pot, some builders' bog and a fresh lick of paint and your pot will be good as new.
5. **Watering needs are reduced**, as the paint seals the pot surface against evaporation.

### Helps Prevent These Aesthetic Effects

Helps prevent efflorescence, the white leaching bloom that appears on wet masonry and ceramics as water dissolves salts and minerals from fertiliser and concrete products and carries them through to the surface.

Helps prevent crazing, the fine web of tiny, shallow cracks that can form on ceramics, concrete, mud, and even wood.

Conceals the non-structural cracking that will occur in all concrete-based products due to shrinkage and expansion.

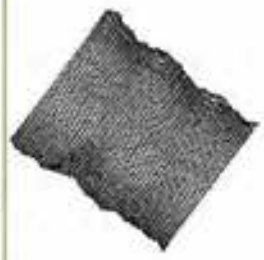
Cannot be washed out or leached away, unlike factory infused colours.

*Always plant in accordance with our planting guide.*

# Planting Guide

**Pots need good drainage.** Water trapped in the pot can cause cosmetic damage or even structural failure. It will also drown your plants.

| No. | DO | DON'T |
|---|---|---|
| 1 | **Do** choose plants that are suitable to growing in pots. | **Don't** choose plants with invasive root systems. Some plants can break any pot. |
| 2 | **Do** raise the pot on feet so that water can flow freely away from the drainage holes.<br>**Do** adjust the feet and pot to remove any rocking.<br>Add window packers, if necessary. | **Don't** set the base of the pot directly on the ground or floor. This encourages silt to block the drainage holes.<br>**Don't** add planting material into the pot before adding any necessary packers.<br>It's much too difficult to add them afterward. |
| 3 | **Do** make sure the pot has clear, open, unblocked drainage holes. | **Don't** block or seal the drainage holes. |
| 4 | **Do** seal the **inside** surface with bitumen sealer. This prevents cosmetic damage from water soaking through the pot walls. | **Don't** line the pot with corflute or plywood. |
| 5 | **Do** cover the drainage holes with a *single* layer of fibreglass flyscreen.<br>**Do** make sure the holes in the flyscreen are at least 1.5 mm wide.<br>**Do** make sure the flyscreen still covers the drainage holes when blue metal is added (in step 6). | **Don't** use shadecloth, or flyscreen with tiny holes. It will clog up.<br>**Don't** use multiple layers. They will clog.<br>**Don't** use metal flyscreen. It will corrode and break.<br>**Don't use geofabric.** Geofabric retains water, preventing drainage. Shadecloth, silt fence, and weed mat will all clog and prevent drainage too. Using any of these will void your warranty. **Only use flyscreen.** |
| 6 | **Do** fill the bottom of the pot with a 50 mm layer of 10 mm blue metal (a type of gravel). This will allow free drainage and keep potting mix from blocking up the fly screen or drainage holes. | **Don't** put foam or styrofoam in the pot to make the planted pot lighter. The foam will compact and block.<br>**Don't** use sand to help drainage. The sand will compact, preventing water from draining freely. |
| 7 | **Do** put the potting mix directly onto the gravel. | **Don't** add another layer of flyscreen. |
| 8 | **Do** use a good quality premium potting mix. Potting mix is designed to drain freely, unlike soil or planting mix. | **Don't** use soil. Soil compacts and hardens, preventing water from draining.<br>**Don't** mix soil into potting mix to make it go further. |



The above information is based on many years of first-hand experience in the modern pot industry and many centuries of collective wisdom growing plants in pots. In the end they're all about letting water escape the pot. For further information, please see our online planting guide at https://www.potswholesaledirect.com.au/pot-care-guide/ or our terms and conditions at https://www.potswholesaledirect.com.au/terms-and-conditions/

**NOT FOLLOWING THE ABOVE WILL VOID YOUR WARRANTY**
